AI-Powered GTM Made Simple: Go Live in Days, Not Months

Replace months-long MAP rollouts with a streamlined, agent-driven setup that accelerates time-to-revenue.

LEVERAGE AI TO DRIVE PIPELINE AND REVENUE GROWTH

Getting a new GTM platform up and running shouldn't hijack your quarter. SalesboxAI is built so your team can go from signup to live, omnichannel campaigns in days—without complex configurations and multiple tools. While native AI Agents handle the heavy lifting across email, web engagement, and social/retargeting, your team focuses on conversations that convert.

Multiple native AI agents transform the chaos of targeting and engaging buying-group members, routing opportunities to the right reps, and tracking funnel progression into a cohesive go-to-market motion—so you reach the right accounts at the right time and accelerate time-to-revenue.

SalesboxAI → Leverage AI to drive Pipeline and Revenue Growth

Every quarter counts. Yet many organizations lose the first 90–120 days of a new MAP rollout just setting things up. That's a full quarter of pipeline lost to delays. SalesboxAI eliminates this lost time. Don't sit in 'implementation limbo' while markets move on.

SalesboxAI swaps complexity for an agent-driven, team-owned rollout that's simple by design. Here's how it works:

- **Quick activation:** Business email verification signs you up.
- **Setting up AI agents:** Multiple agents, including GTM Agent and Sales Rep Agent, are deployed and tuned to your GTM motion—no module-by-module configuration.
- **Target & suppression:** Account lists, suppression lists, and assets for the asset hub shared by you enforce clean targeting from day one.

Treat asset hub as a central repository for all campaign assets. Upload creatives and campaign assets so agents always pull the latest approved content.

- **Buyer Personas:** Pin down who you're selling to. Map their pain points, triggers, and go-to CTAs so your outreach feels personal and purposeful.
- **Email workflow** (team-controlled): Once your emails are ready, share them with SalesboxAI for delivery. Your agents will handle delivery and personalization at scale.

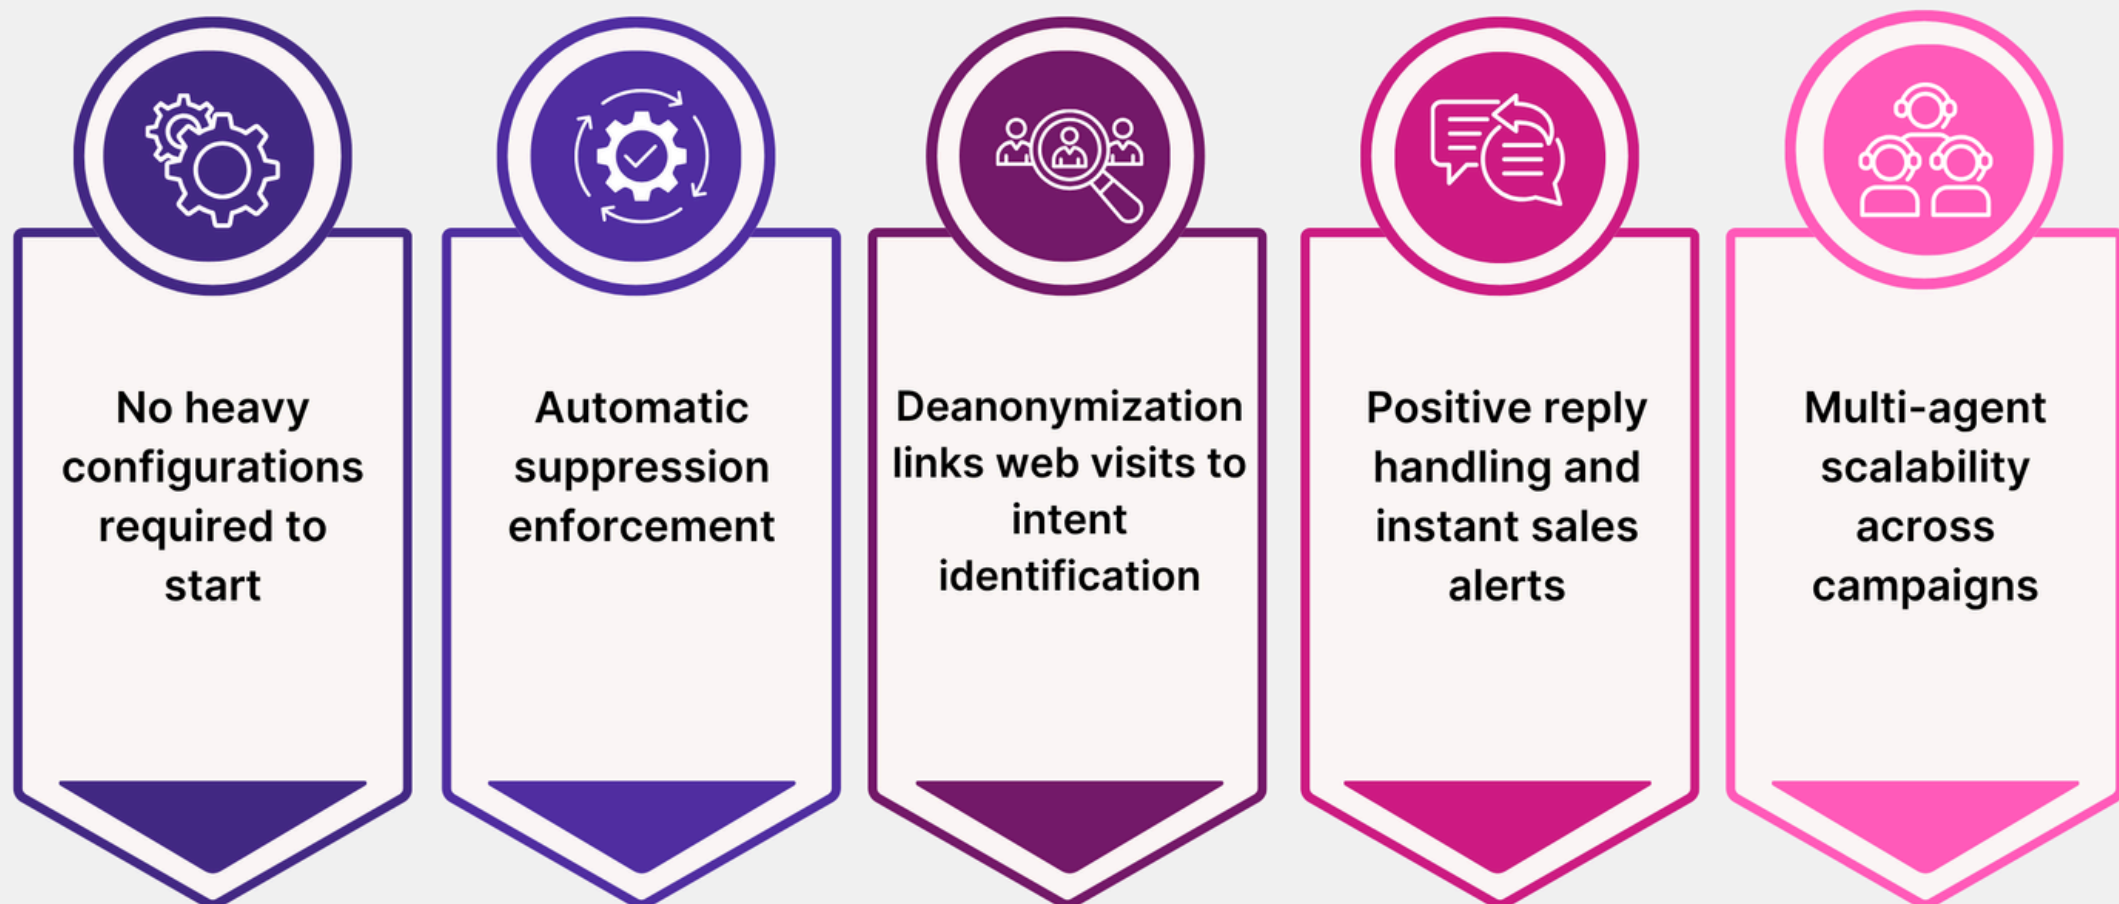

Automated routing and instant notifications let sales reps act the moment intent is detected. Agents execute engagement across channels, keeping your messaging consistent and measurable.

Why This Improves Efficiency, Targeting, and Time to Market

- ⚡ **Efficiency:** Multiple AI Agents run campaigns and follow-ups in parallel—no spreadsheet juggling.
- 🎯 **Targeting:** Personas + intent product terms + scoring concentrate effort on the right people, at the right time.
- 🕒 **Time to market:** From activation to pipeline in days. No months-long MAP rollout.

Behind the Scenes - AI Agents on Duty

From RevOps to SDRs to AEs, everyone benefits. With SalesboxAI, you're not just adopting a platform—you're empowering your team with native AI agents that make every stage of your GTM motion faster, smarter, and more predictable. From website deanonymization, initial targeting to multi-channel personalized engagement and lead routing, every step is orchestrated for efficiency, speed and measurable impact.
